

# MAKE YOUR OWN OWL STAINED GLASS WINDOW

## CRAFT INSTRUCTIONS

### YOU WILL NEED:

- Black Card
- Owl Template
- Scissors
- Glue Stick
- Large Piece of Clear Cellophane
- Coloured Cellophane (sweet wrappers work well!)

**15-25 mins**

### WHY AN OWL?

Florence Nightingale rescued a small owl who was being attacked. She looked after the owl and loved it a lot, she named her 'Athena' and would carry her around in special pockets added to her dresses.

The real Athena is on display at the museum.

## STEP 1

Print out the template and stick it to a piece of black card.  
Carefully cut out the template, you might want a grown up to help you here as it can be fiddly!

## STEP 2

Stick your cut out template to a piece of clear cellophane.  
Turn it over so the cellophane is underneath the template.

## STEP 3

Now stick small coloured pieces of cellophane on top to create your stained glass effect.  
Try and cover it all so none of the clear cellophane can be seen.

## STEP 4

Once you have finished leave the glue to dry.  
When it is all dry cut around the edge of the template to cut off any extra cellophane.  
Hold up to a window to see the light shine through!
